ESTABLISHED

NSD Medical Supplies was established by experienced gentlemen in the Medical Field industry. NSD Medical brings cumulative 80 years of experience in managing medical products between suppliers and healthcare professionals (HCP).

OUR REACH

NSD Medical has an extended reach to the Global market and not limited to specific region.

What does NSD Medical Stand for?

NSD founders worked mainly in the disposable business and understand the need and the know how to service the HCP in the healthcare industry with smart offering that goes beyond the standard in servicing. The NSD Medical objective is to fulfil the unattended HCP needs and make the difference in servicing this industry. Becoming a reliable partner to the HCP is the key performance indicator (KPI) to our success and achievement. We believe that unless NSD Medical makes a difference in its offers, quality and service, and stand to what it believes in business conducts and responsiveness, NSD Medical business path will be slower than what it is planned for. NSD Medical believes that the relationship with the HCP is rather a partnership to service their patients and the industry in better ways than the current.

OUR PROMISE

NSD Medical will continue developing its product offers to reach all specialties in the medical field to make sure that no gap is left uncovered.

QUALITY ASSURANCE

Having Achieved the ISO, CE, FDA and other international system certification, SOP guarantees eligible quality.
